CARDIAC CARE

## The Women's Heart Program at Cooper and Inspira Cardiac Care

The Women's Heart Program at Cooper and Inspira Cardiac Care is one of the most comprehensive programs, with the largest female cardiology group in southern New Jersey. The program offers a full spectrum of services from prevention and diagnosis to the most advanced technology and innovative treatments. Our team of Women's Heart physicians is dedicated to providing individualized care that supports optimal cardiovascular health and wellness.

### Specialized program available for complex cardiovascular needs in women

- Cardiac and vascular management of the female diabetic patient
- Cardiac assessment and monitoring of the female patient undergoing chemotherapy
- Cardiac assessment and monitoring of the high-risk pregnancy patient
- Risk stratification and risk factor modification of the post-menopausal, metabolic syndrome patients
- Cardiac assessment and monitoring in obesity management, as well as the female patient undergoing bariatric surgery

### Access to the latest options, diagnosis, and treatment

Women have unique cardiovascular needs that may require special testing and treatments. The Women's Heart Program at Cooper and Inspira Cardiac Care provides access to:

#### Comprehensive cardiovascular risk assessment including:

- In-depth history and risk evaluation survey
- Physical examination

#### Advanced diagnostic testing including:

- Complex cholesterol/lipid disorder screening
- Echocardiography and nuclear imaging
- Diabetes and peripheral vascular disease screening

#### State-of-the-art treatment including:

- Management of complex cholesterol disorders
- Non-surgical heart and vascular treatments, including angioplasty and stent placement
- Cardiac arrhythmia management including medications, ablation, therapy, and device implantation
- Advanced heart failure management
- Cardiac surgery, including minimally invasive and off-pump procedures
